Homework points will be assigned for the quality of mathematics as well as quality of presentation. Important presentation pieces that you should consider are:

- Do not begin a proof with ”what-is-to-be-proved”.
- Capitalize the first word of a sentence.
- Avoid beginning a sentence with a mathematical symbol.
- Be careful of sentence structure and punctuation. Take time to reword awkward sentences.
- Be careful of paragraph structure.
- Check your homework for spelling and grammar.
- You should be continually expanding your \LaTeX constructs for symbols and mathematical notation throughout the semester.
- Be sure to include a statement comparable to ”This completes the proof.” at the end of every proof.
